

TRANSPORTATION in Monroe County

Walkability is based on walking routes to destinations such as grocery stores, schools, parks, restaurants and retail. It also takes into consideration pedestrian friendliness (block length, intersection density, route directness etc.).

Transit scores calculate distance to closest stop on each route, route frequency, type etc.

it can be tough to accomplish necessary tasks without a car in Monroe County like going to the grocery store, the doctor's office, or work - even on a weekday
